Report Overview

An investigation into the use of mobile biometrics for financial services. This report includes a review of current global adoption, market analysis including key drivers and barriers for adoption, interviews with leading stakeholders, technology analysis with review of key biometric technologies and profiles of companies supplying mobile-based biometric systems for financial services plus forecasts (regional and global) for users and revenue within the six-year period 2015 to 2020.

Report Contents / Forecasts

- **Executive Summary**
- **Market & Technology Analysis**
 - An introduction to biometric technologies
 - How mobile biometrics is used for financial services
 - Market Drivers & Barriers
 - Regulation & Technology Standards
 - Mobile Biometric for Financial Services Market Adoption and Analysis
 - Banking
 - Payments
 - ATM
 - Mobile Biometric Technology Analysis & Vendor Review
- **Forecasts**
 - Users
 - By Technology
 - By Service Type
 - Combined
 - Revenue
 - By Technology
 - Combined
 - Payment Transactions & Value
- **Appendices**
 - Appendix A – Companies referenced
 - Appendix B – Goode Intelligence Biometric Assessment Tool

Who Should Purchase this Report?

This report is aimed at technology vendors and service providers involved in providing biometric systems for financial services and financial institutions needing to fully understand the reasons for deploying and the types of biometric solutions they should implement. Additionally, the report is suitable for mobile OEMs looking to support biometrics and investors looking to take advantage of this growing industry.
