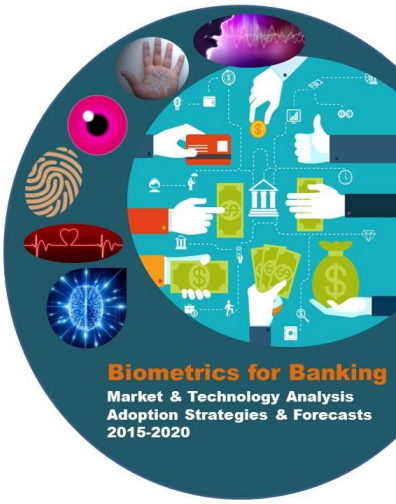
Report Overview

An investigation into the use of biometrics within the banking sector. This comprehensive report includes a review of current global adoption, market analysis including key drivers and barriers for adoption, interviews with leading stakeholders, technology analysis with review of key biometric technologies and profiles of companies supplying biometric systems to banks plus forecasts (regional and global) for users and revenue within the six-year period 2015 to 2020.



Report Contents / Forecasts

- **Executive Summary**
- **Market & Technology Analysis**
  - An introduction to biometric technologies
  - How is biometrics used in banking
  - Market Drivers & Barriers
  - Regulation & Technology Standards
  - Biometric Bank Technology; Adoption, Analysis & Vendors
    - Behavioral Biometrics
    - Eye (Iris & Eye-Vein)
    - Face
    - Finger-Vein
    - Palm Vein
    - Heart
    - Voice
- **A Guide for Banks in Choosing the Right Biometric System**
- **Forecasts**
  - Users
    - By Technology
    - By Bank Channel
    - Combined
  - Revenue
    - By Technology
    - Combined

Who Should Purchase this Report?

This report is aimed at technology vendors and service providers involved in providing biometric systems to banks and banks wanting to understand the reasons for deploying and what biometric solutions they should implement. The report is also aimed at management and technology consultants, hardware ODMs looking to support biometrics and investors looking to take advantage of this growing industry.
